

World ParaVolley Anti-Doping Commission Annual Report 2016

Anti-Doping Testing Statistics 2016

Over the last 12 months. World ParaVolley has conducted the following activities:

TESTING

- Eight (8) in-competition tests (4M, 4F). The distribution of athletes tested covered athletes from Americas, Asia and Europe.
- One (1) targeted out-of-competition test was conducted from the Registered Testing Pool list
- One (1) tip off received and followed up

From the World ParaVolley sanctioned tests above, no anti-doping rule violations were found.

Work is underway to review of our testing strategy and distribution.

TUE's

- 8 TUE's were issued

EDUCATION

- Education material was available during international competition
- World ParaVolley is currently reviewing its education plan in order to better serve the athletes and support personnel

During the last 12 months, we have also seen changes to the structure of personnel involved in anti-doping. We hope to see further growth in numbers as more join our ranks to allow us to departmentalise activities.
